Re: Final Record of Decision Errata Pages  
Operable Unit 4 (Site 15), Naval Air Station Pensacola  
Pensacola, Florida

Dear Ms. Boldyreff:

On behalf of the Navy, EnSafe Inc. is pleased to submit one copy of the errata pages for the signed Final Record of Decision for Operable Unit 4 (Site 15), at the Naval Air Station Pensacola in Pensacola, Florida. Please replace the pages previously submitted with the pages enclosed.

These errata pages were completed in response to electronic mail received on August 9, 2000 from the Florida Department of Environmental Protection. Please replace the pages previously submitted with the pages enclosed. The comments and responses are presented below:

**Comment 1:**

Figure 6-2, Arsenic Risk in Site 15 Shallow Groundwater: This figure shows only the Phase IIIC risk (aka Figure 9-8 from Final RI). This figure would match the text on Page 37 much better if it were to include data from MWs sampled during earlier phases as well (see Figures 9-3 to 9-8 in Final RI).

**Response:**

**Agreed. The revised figure is enclosed,**

**Comment 2:**

Page 72, Section 8.1.2.5 Cost: In the first sentence, there is a 20 year versus 30 year cost for Alternative 2. Add a statement stating that "improved housekeeping and source removal would shorten the time to achieve cleanup goals".

Ms. Linda Boldyreff  
Page 2

**Response:**

A statement has been added to address the improved housekeeping in the site area and its impact on the time to achieve cleanup goals.

**Comment 3:**

Page 78, Section 8.2.2.5 Cost: Correct the first sentence. Cost in Table 8-2 is for four soil alternatives.

**Response:**

The sentence has been revised to correct reflect the four soil alternatives provided in Table 8-2.

If you should have any questions or need any additional information regarding the document, please do not hesitate to call me.

Sincerely?  
EnSafe Inc.
